EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. W. Lee, Jr. on April 18, 2006.

The application has been amended as follows:

In claim 148, line 5, the recitation "wherein reading heads are independently adjustable so that each is accurately positionable over or under a sample" has been deleted and replaced with --comprising the step of independently adjusting the reading heads so that each is accurately positionable over or under a sample site.—

Drawings

In order to avoid abandonment, the drawing informalities noted in the paper mailed on 2/01/2006, must now be corrected. Correction can only be effected in the manner set forth in the above noted paper.

Allowable Subject Matter

Claims 110-153 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claim 110, the prior art of record taken along or in combination, fails to disclose or render obvious gathering the plurality of parallel beams using optical fibers, which map the beams onto an addressable charge coupled detector array; individually addressing different regions of the detector array onto which the beams impinge; providing a shutter to inhibit the transfer of light to the detector array, in combination with the rest of the limitations of the claim.

The reasons for allowance of claims 112-143 are stated in the office action mailed 2/1/2006.

As to Claim 144, the prior art of record taken along or in combination, fails to disclose or render obvious collecting the beams beyond that point by detector lens means which serve to reconstitute the parallel beams and gathering the parallel beams using optical fibers, which map the beams onto the detectors, in combination with the rest of the limitations of the claim.

As to Claim 145, the prior art of record taken along or in combination, fails to disclose or render obvious additional shutter means synchronized with that associated with the source to inhibit light of any wavelength reaching the detectors while excitation light is projected into the system, in combination with the rest of the limitations of the claim.

As to Claim 148, the prior art of record taken along or in combination, fails to disclose or render obvious independently adjusting the reading heads so that each is accurately positionable over or under a sample site, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
